DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Hyma (4,372,575).

Hyma discloses a fixing arrangement for fixing a spring and/or damping element 22 to a continuous hollow member 18 of a motor vehicle body of a motor vehicle, a through-opening (see figure 4) for the spring and/or damping element 22 being let into a lower flange 66 of the hollow member 46, the spring and/or damping element 22 fixing a wheel suspension member of the motor vehicle to the hollow member 46 by way of a load-distributing support, the spring and/or damping element 22 passing right through the hollow member 46 and extending upwards from an upper flange 50 of the hollow member 46, the load-distributing support comprising a radially protruding socket 48 by which the spring and/or damping unit 22 is supported against the upper flange 50 of the hollow member 18, and an adapter plate 64, which when fitted is fastened to the socket 48 with a bracing and separating effect, supported on the lower flange 66 of the hollow member 18.

Allowable Subject Matter

3. Claims 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

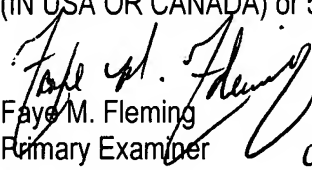

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
